PRELAB EXERCISES (2 points)

This prelab must be completed and handed in to the lab TA at the start of the lab.

Question 1

1 point

In measurements using the linear track, what is the purpose of measuring the **average fraction lost** for momentum and energy?

Question 2

1 point

(a) ($\frac{1}{2}$ point) Briefly describe both methods used to measure v_b in this lab.

(b) ($\frac{1}{2}$ point) Why might we want to use two independent methods to estimate v_b ?
