PRELAB EXERCISES (2 points)

This prelab must be completed and handed in to the lab TA at the start of the lab.

Question 1

1 point

Using the equation $\lambda = d \sin \theta$, derive an expression for $(\Delta\lambda/\lambda)^2$ using the method of error propagation described in [Appendix B: Error Analysis](#) on the Physics Labs website.

Question 2

1 point

How can you determine the slit separation by observing the interference pattern in this experiment? Explain your reasoning.
